Professional Objective

To advance numerical algorithms for scientific computation to fully utilize evolving computer architectures through basic and applied research and to develop mathematical software for the scientific computing community.

Education

Emphasis in numerical analysis, applied mathematics, and computer science.

University of Illinois at Urbana-Champaign, Computer Science, Ph.D., 1988

Purdue University, Computer Science, M.S., 1983

University of South Carolina, Mathematics, graduate studies, 1980

Clarkson University, Mathematics, M.S., 1978

Clarkson University, Mathematics, B.S., 1977

Employment

1993-present, Computer Scientist, Mathematical and Computational Sciences Division, National Institute of Standards and Technology. Plan and conduct research and development of numerical methods, mathematical software, and related tools, and consult and collaborate in their application to scientific problems. Primary field of research is numerical solution of elliptic partial differential equations, multigrid methods, adaptive methods, parallel computing, solution of Schroedinger equations, and development of Fortran 90 tools.

1988-1993, Senior Member Engineering Staff, Advanced Technology Laboratory, General Electric Corporation. Responsible for activities involving numerical algorithms and parallel processing, including implementations on CM-2 and iPSC/860. Also involved in sequential and parallel algorithms for combinatorial optimization, algorithm-based fault tolerance, signal sorting, data association and target tracking, and computer supported collaboration.

1977-1988, Graduate Assistant at each university attended. Teaching of undergraduate classes in mathematics and computer science. Research in the numerical solution of elliptic partial differential equations on nonrectangular domains. At Purdue, development of collocation software for ELLPACK, a software package for elliptic PDEs. At Illinois, development, analysis and coding of adaptive refinement and multigrid techniques for high order finite element solutions of partial differential equations.

Visiting Positions

June 1997, ICASE, NASA Langley Research Center, Hampton, VA

First International Conference on Numerical Analysis & Computational Mathematics, Cambridge, UK, May 23-26, 2003.

Eleventh Copper Mountain Conference on Multigrid Methods, Copper Mountain, CO, March 30-April 4, 2003.

Sixth IMACS International Symposium on Iterative Methods in Scientific Computing, Denver, CO, March 27-30, 2003.

IMACS Workshop on Adaptive Methods for Partial Differential Equations, Toronto, Canada, August 6-9, 2002.

International Conference on Computational Science ICCS2002, Workshop on PDE Software, Amsterdam, The Netherlands, April 21-24, 2002.

Seventh Copper Mountain Conference on Iterative Methods, Copper Mountain, CO, March 25-29, 2002.

Sixth U.S. National Congress on Computational Mechanics, Dearborn, MI, August 1-3, 2001.

Tenth SIAM Conference on Parallel Processing for Scientific Computing, Portsmouth, VA, March 12-14, 2001.

Workshop on Computational Methods for Few-Body Dynamical Systems, Gaithersburg, MD, November 15–17, 2000.

First SIAM Conference on Computational Science and Engineering, Washington, DC, September 21–24, 2000.

J3 Fortran Standards Comittee Meeting, Las Vegas, NV, March 1–3, 2000.

Workshop on Graph Partitioning and Applications: Current and Future Directions, Minneapolis, MN, October 14–15, 1999.

Fifth US National Congress on Computational Mechanics, Boulder, CO, August 4–6, 1999.

International Symposium on Computational Science in honor of John Rice, West Lafayette, IN, May 21-22, 1999.

Ninth Copper Mountain Conference on Multigrid Methods, Copper Mountain, CO, April 11–16, 1999.

Ninth SIAM Conference on Parallel Processing for Scientific Computing, San Antonio, TX, March 22–24, 1999.

Tenth International Conference on Domain Decomposition Methods, Boulder, CO, August 10–14, 1997.

8^{th} Copper Mountain Conference on Multigrid Methods, Copper Mountain, CO, April 6–11, 1997.

8^{th} SIAM Conference on Parallel Processing for Scientific Computing, Minneapolis, MN, March 14–17, 1997.

OpenGL ARB meeting, San Diego, CA, December 9, 1996.

Grid Adaptation in Computational PDEs: Theory and Applications, Edinburgh, Scotland, July 1–5, 1996.

Copper Mountain Conference on Multigrid Methods, Copper Mountain, CO, April 2–7, 1995.

7^{th} SIAM Conference on Parallel Processing for Scientific Computing, San Francisco, CA, February 15–17, 1995.

Supercomputing '94, Washington, DC, November 14–18, 1994.

ICASE/LaRC Workshop on Adaptive-Grid Methods, Hampton, VA, November 7–9, 1994.

Workshop on Quantum Computing and Communication, Gaithersburg, MD, August 18–19, 1994.

14^{th} IMACS World Congress on Computational and Applied Mathematics, Atlanta, GA, July 11–15, 1994.

Workshop on Domain-Based Parallelism and Problem Solving Decomposition Methods in Computational Science and Engineering, Minneapolis, MN, April 25–26, 1994.

Supercomputing '93, Portland, OR, November 15–19, 1993.

Sixth Copper Mountain Conference on Multigrid Methods, Copper Mountain, CO, April 4–9, 1993.

7^{th} IMACS International Conference on Computer Methods for Partial Differential Equations, New Brunswick, NJ, June 22–24, 1992.

868^{th} Meeting of the American Mathematical Society, Numerical Linear Algebra Session, Philadelphia, PA, October 12–13, 1991.

Fifth Conference on Domain Decomposition Methods for Partial Differential Equations, Norfolk, VA, May 6–8, 1991.

Fifth Copper Mountain Conference on Multigrid Methods, Copper Mountain, CO, March 31 – April 5, 1991.

Unstructured Scientific Computation on Scalable Multiprocessors, Kill Devil Hills, NC, October 29–31, 1990.

SPIE's 1990 International Symposium on Optical and Optoelectronic Applied Science and Engineering, San Diego, CA, July 8–13, 1990.

Copper Mountain Conference on Iterative Methods, Copper Mountain, CO, April 1–5, 1990.

Sixth Parallel Circus, New York, NY, October 27–28, 1989.

Parallel Computing for GE Applications, Schenectady, NY, September 27-29, 1989.

Fourth Parallel Circus, New Brunswick, NJ, December 2–3, 1988.

Virginia Tech-ICAM Conference on Numerical Solutions of Partial Differential Equations, Blacksburg, VA, September 24–27, 1988.

Scientific Applications of the Connection Machine, Moffett Field, CA, September 12–14, 1988.

Conference in honor of Jim Douglas, Chicago, IL, 1987.

3^{rd} IMACS International Conference on Computer Methods for Partial Differential Equations, Bethlehem, PA, 1979.

SIAM conference, Knoxville, TN, 1979.

Numerical Analysis Conference, Syracuse, NY, 1977.

Invitational Workshops

A posteriori Error Estimation and Adaptive Approaches in the Finite Element Method, MSRI, Berkeley, CA, April 3–14, 2000.

Scalable Solvers Workshop '99, Livermore, CA, June 23–25, 1999.

Fast Solvers for Partial Differential Equations, Oberwolfach, Germany, May 30–June 4, 1999.

Symposium on Adaptive Methods for Partial Differential Equations, Salt Lake City, Utah, June 22–24, 1998.

IMA Workshop on Grid Generation and Adaptive Algorithms, Minneapolis, MN, April 28–May 2, 1997.

Adaptive Methods for Partial Differential Equations, Oberwolfach, Germany, February 16–22, 1997.

Workshop on Parallel Unstructured Mesh Computations, Argonne, IL, September 9–11, 1996.

ARPA/NSF Scalable Scientific Software Libraries and Problem Solving Environments Workshop, West Lafayette, IN, September 25–27, 1995.

Software

PHAML, a Fortran 90 program for the solution of elliptic boundary value and eigenvalue problems, using finite elements, hp-adaptive refinement, and multigrid, on distributed memory parallel computers. In addition to its use by many people for running physical simulations, it has been used in classes on parallel computing at Purdue University, and as an application code in research on load balancing for heterogeneous clusters at Rensselaer Polytechnic Institute and Williams College. Available at http://math.nist.gov/phaml.

Version 1.2.9 February 2004
Version 1.2.10 February 2005
Version 1.2.11 November 2005
Version 1.2.12 September 2006

StopWatch, a Fortran 90 module for portable measurement of execution time of program segments. Available at http://math.nist.gov/stopwatch.
Version 0.8 June 1995
Version 1.0 January 1997

PADE, the Parallel Applications Development Environment. With J.E. Devaney, R. Lipman, M. Lo, M. Edwards, J. Turner, and C.W. Clark. Available from math.nist.gov.
Version 1.2 May 1995
Version 1.4 November 1995

MGGHAT, a portable FORTRAN software package for the solution of 2D linear elliptic partial differential equations, using adaptive refinement, multigrid and high order finite elements. Available at *netlib* and *mgnet*.
Version 1.0 March 1993
Version 1.1 June 1994

GENCOL, a FORTRAN 77 subroutine for the solution of general second order elliptic partial differential equations in two dimensions on general domains using collocation with hermite bicubic elements. Contributed to ELLPACK and Collected Algorithms of the ACM (TOMS). 1982

Standards

2000, Presented several recommendations on C interoperability to the Fortran Standards committee, many of which became part of the Fortran 2003 standard.

1998, Developed the Fortran 90 bindings for OpenGL, which became part of the OpenGL standard.

Teaching

1995-2000, Fortran 90 for FORTRAN 77 Programers, NIST Gaithersburg and Boulder.

1980, Fortran, Purdue University.

1979, Calculus for Business Majors, University of South Carolina.

1978, Calculus, Clarkson University.

Patents

W.F. Mitchell, Regular and Fault-Tolerant Kalman Filter Systolic Arrays, U.S. Patent 5,323,335, June 21, 1994, rights owned by Lockheed Martin Corporation.

Awards

2008, ITL Outstanding Journal Paper Award

1996, DOC Bronze Medal for work on PADE

1978, membership in Pi Mu Epsilon, honorary mathematics society

9th International Parallel Processing Symposium

10th International Conference on Domain Decomposition Methods

41st Magnetism and Magnetic Materials Conference

Editor, International Journal of Applied Mathematics and Computational Science, 2006-present.

Editor, Journal of Numerical Analysis, Industrial and Applied Mathematics, 2006-present.

Editor, Applied Numerical Analysis and Computational Mathematics, 2001-2005.

Member Scientific Committee, International Conference of Numerical Analysis and Applied Mathematics (ICNAAM 2008), Kos, Greece, September 16-20, 2008.

Co-organized (with Ronald Boisvert, NIST) a minisymposium on PDE Software in Applications, SIAM Annual Meeting, San Diego, CA, July 7–11, 2008.

Member Program Committee, International Conference on High Performance Computing, Networking and Communication Systems (HPCNCS-08), Orlando, FL, July 7-10, 2008.

Member Scientific Committee, International Conference of Numerical Analysis and Applied Mathematics (ICNAAM 2007), Corfu, Greece, September 16-20, 2007.

Member Program Committee, International Conference on High Performance Computing, Networking and Communication Systems (HPCNCS-07), Orlando, FL, July 9-12, 2007.

Member Scientific Committee, International Conference of Numerical Analysis and Applied Mathematics (ICNAAM 2006), Hersonnisos, Crete, Greece, September 15-19, 2006.

Chaired the session on Finite Element Methods at the Twelth SIAM Conference on Parallel Processing for Scientific Computing, San Francisco, CA, February 22-24, 2006.

Member Scientific Committee, First International Conference on Numerical Analysis & Computational Mathematics, Cambridge, UK, May 23-26, 2003.

Chaired the session on Discretizations at the Sixth IMACS International Symposium on Iterative Methods in Scientific Computing, Denver, CO, March 27-30, 2003.

Co-organized (with Prof. Joseph Flaherty, RPI) a minisymposium on Dynamic Load Balancing for Adaptive Computations, Sixth U.S. National Congress on Computational Mechanics, Dearborn, MI, August 1-3, 2001.

Chaired the session on Advances in Grid and Mesh Technology, Tenth SIAM Conference on Parallel Processing for Scientific Computing, Portsmouth, VA, March 12-14, 2001.
